## Ashman Resigns From Town Employ

May Have Aviation Advisor Sent Here to Study Airport; Endorse Old Age Pension Resolution.

Regular meeting of the council was held on Saturday morning. Present Mayor Aboussay, Councilors Dutil, Jenkins, Ramsay and Wilson.

Archie Fraser, town ashman, tendered his resignation from that position effective Oct. 30, 1945. The resignation was accepted. It was decided that the Works & Property committee and the Health committee combine to give study to this position and report their findings at the next meeting.

A letter of thanks was received from Mr. H. Allen for the good job done to the roadway leading into his property.

A letter was received from the Calgary Board of Trade in reply to the council's re aviation and the local airport. The letter advised that some preliminary and practical steps should be taken at once to provide landing facilities here and council was advised to write Mr. W. S. Lawson, District Inspector, Western Airways, Dept. of Transport, Vancouver, BC, and ask him to send an advisor here to talk the matter over. Enclosed with the letter was a report of the aviation conference held in Calgary last September and at which Coleman was represented by Mayor Frank Aboussay, who was then a councillor.

A copy of the resolution sent to Ottawa re Old Age pensions by a Calgary organization was received and endorsed by council. The resolution calls for a monthly pension of \$50 to all Canadians 60 years and over.

## Coleman Family Bereaved

Mr. and Mrs. Ernest Kennedy and family and Miss Pearl Kennedy, of the local hospital staff, attended the funeral at Cranbrook Saturday of their father, Mr. J. E. Kennedy, Cranbrook oldtimer, who passed away Wednesday evening in the St. Eugene hospital.

The late Mr. Kennedy arrived in the East Kootenays in 1896, or about two years prior to the completion of the Crows' Nest Pass branch of the railway and grew up with the country in its fullest sense. He drove a four-horse team during railway construction days, saw service in the South African war, served several years as government agent and mining recorder and in later years conducted a real estate and insurance business in the city. He devoted a great deal of time to church and welfare work during his long residence in the city.

Surviving besides his widow are two sons, Ernest residing at Coleman, and Patrick, at present overseas, and one daughter, Pearl, residing at Coleman. There are five brothers, Terrance, at Macleod; Timothy, at Tisdale, Ont.; Patrick, in Star City, Sask.; Martin, in Dearborn, Mich.; and Daniel, at North Bay, Ont.; also a sister at Ballican, BC.

### CARD OF THANKS

We wish to give our heartfelt thanks to those who sent expressions of sympathy, cards, letters and mass cards or who assisted in any way.—The Kennedy family.

## RONALD JONES SENDS HOME SOUVENIRS

This week Mrs. Arthur Jones called at The Journal office to display three souvenirs received from her son, Ronald, RCAF, overseas.

The most striking souvenir was that of a huge swastika flag. It was made of a soft cloth and appeared to be of strong material, much in contrast to the flags purchased here. The other souvenirs consisted of an airman's wings and a second-class iron cross.

It is quite probable that when Ronald arrives home, which he is expected to do within the next week or two, that he will have the flag displayed with other souvenirs in the Legion club.

## Flt.-Lt. W. Naylor Awarded Bar To D.F.C.

### FLT.-LT. NAYLOR, DFC AND BAR

Award of decorations to eight Alberta airmen, including Flight Lieutenant W. K. Naylor, DFC, of Coleman, was announced in Ottawa on Oct. 1 by air force headquarters.

Flt.-Lt. Naylor, son of Mr. and Mrs. J. H. Naylor, of Coleman, was awarded a Bar to his Distinguished Flying Cross, which he was awarded during the summer of 1944 for gallantry and leadership in action. The young officer, who has now twice won the DFC, enlisted in the RCAF in June, 1941, and arrived overseas in September of the following year. Active in sports, particularly in tennis, he was educated in Coleman schools.

Citation accompanying the award is as follows: "Flt.-Lt. Naylor has now completed his second tour of operations. He has participated in attacks against many heavily defended targets, including Berlin, Hamburg and the Ruhr. Since the award of the DFC his outstanding skill and great courage, combined with his unflinching determination and devotion to duty, have continued to be of the highest order. No opposition has ever deterred this officer from achieving successful results."

## T.B. Questions And Answers

Q. How are TB germs (tubercle bacilli) taken into the system?

A. The droplets of moisture forced out during coughing, and containing tubercle bacilli, are inhaled. Tubercle bacilli may also be taken into the body by way of food, i.e., bacilli deposited on food by coughing, or from hands, or, in the case of cattle tubercle bacilli, by way of milk and its products.

Q. What diseases may predispose one to tuberculosis?

A. The infectious diseases of childhood, especially measles, are thought to prepare the way for development of tuberculosis. Any disease seriously undermining the health may be followed by evidence of tuberculosis. In most instances, perhaps, this is a reactivation of a dormant tuberculosis.

## Alberta Miners Still Protests Meat Rationing Issue; Gordon Says They Will Not Receive Extra Meat

### Miners Will Get No More Meat Rations Says Donald Gordon

CALGARY, Oct. 2.—(CP)—Alberta and British Columbia miners will not get more meat rations unless they come up with better arguments than they have so far, Donald Gordon, chairman of the War-Time Prices and Trade Board, said at a press conference on his arrival here Monday night.

Mr. Gordon strongly criticized their strike action. The issue was one of government, he said. "Is there a government at Ottawa, or are the miners the government." Taking the law into their own hands and trying to "bludgeon" the authorities into concessions would get them nowhere, he said.

National nutritional experts say the miners and any other class of laborers can do their work on the existing ration, he said. He added he was "perfectly satisfied that the overwhelming majority of Canadians" were strongly behind meat rationing.

Gordon's Speech in Calgary Rouses Ire of Miners From Coast to Coast; Asks if Miners Are The Government.

Pass miners as well as those throughout District 18, UMW, are still idle in their collective protest against prevailing meat regulations. The miners state they cannot work on present weekly meat allotment and demand that their ration be doubled. Neither Donald Gordon, chairman of the Wartime Prices and Trade Board, nor Ottawa show signs of giving in to the miners' demands and as the two factions stand firm uneasiness is beginning to be felt by some centres whose coal supplies are running dangerously low.

Gordon, in a speech at Calgary

on Tuesday, was outspoken in his condemnation of the miners. The speech has roused the ire of union executives from coast to coast. Gordon, in a conference with Robert Livett, president of District 18, UMW, stated that if the striking miners in western Canada go back to work then the government will go into the question of their demand for increased meat rations.

On Tuesday evening the executives of the miners' unions in the Pass met in Blairmore and agreed to stand firm in their demand for double fresh meat rations.

The local coke ovens are still being operated, sufficient fuel being available on the surface to fire them for several more days.

## Lac Alfred Jones To Return Home This Week

LAC Alfred Jones, RCAF, who has been overseas for the past several years, is due to arrive in Calgary this week end. His wife will travel to Calgary to meet him.

### SCHOOL BOARD DRAFTS JANITORS' NEW WAGE SCHEDULE

At a recent meeting of the School Board a new wage schedule was drafted for the janitors.

The three men are now to receive \$130 per month with pay every two weeks and the cost-of-living bonus eliminated. The two ladies are to receive \$65 per month, with a pay cheque every two weeks. There is no longer a head janitor.

### L/PL J. KANIK RETURNED HOME LAST WEEK

Last Thursday Lance Corporal John Kanik, son of Mr. and Mrs. Karl Kanik, arrived home from overseas after serving for four years. He served in Britain and then went with Canadian forces into France, Belgium, Holland and Germany. He enlisted in the RCA in May, 1940, and went overseas in 1941 with the Royal Canadian Engineers.

## EXPLANATION

Owing to the change of schedule from two programs a week to three the news reel, which was formerly shown on Saturday nights, is now showing on Thursday and Friday.

As the news is booked with the Thursday-Friday program we find it impossible to change it at the present time. We are trying to secure a second news reel that can be shown at the Palace on Saturday and Monday programs, but at the present time all available issues are not current enough. —Cole's Theatres.

## Lieut. W. Asbridge Missing In Action Over Japan

Was Shot Down in Action Over Honshu Islands on July 18; Received Early Education in Local Schools.

A former Coleman youth, Lieut. Wm. Asbridge, 21, is listed as missing in action according to word received by relatives residing at the Pacific coast.

Lieut. Asbridge was leading an all-Canadian air squadron based on the British aircraft carrier HMS Formidable in Japanese waters and was with his squadron over Honshu Islands, Japan, on July 18 when he was shot down during a raid. He had seen action on many seas with the famous 3rd fleet.

Lieut. Asbridge first came to Coleman in 1926 at the age of two with his parents. He received his early schooling at the local public school. His father, Mr. James Asbridge, was an employee of International office, while his mother was well known for her beautiful singing voice. They left Coleman for Mercoval and are at present residing at 9804-88th Ave., Edmonton.

Mr. John Ramsay is an Edmonton business visitor this week.

Mr. W. Dutil, accompanied by Mr. and Mrs. George Jenkins, visited at Calgary this week.

Mr. Owen Jones is the guest of his parents, Mr. and Mrs. Lewis Jones.

## Opinions Wanted On Cemetery Fee Proposal

Proposed to Levy a \$10 Fee Per Plot; Use Money to Keep Graves in Proper Order.

Parties interested in the beautification of the local cemeteries have come forward with the proposal of charging a fee for all future plots in both the union and Catholic cemeteries. Money derived from the sale of these plots would be under the trusteeship of the town council who would use the money for nothing else than the beautification of the cemeteries. \$10 has been suggested as the fee. In addition to the fees collected there would still be the annual \$200 cemeteries' appropriation secured from the council this year.

Council is aware that within the next year or two attention will have to be given to the union cemetery which is almost finished and plans made for the use of a new area of ground. Here again proposals have been made this time that when the new cemetery is put into use that tombstones be barred and instead plates be used similar to modern city cemeteries. Should this proposal meet with the approval of citizens a lawn mower would be enabled to cut grass on all graves without obstacles continually coming up in its path.

Opinions of Coleman citizens are requested on these proposals through the columns of The Journal. Should citizens have counter proposals they are also asked to make them known through The Journal columns. No action has been taken on the two proposals listed above, but council would welcome suggestions for cemetery beautification from the citizens.

## Butchers Returned To Stores Wednesday

Had Been Idle Seven Days; Found Meat Being Sold in Stores of Surrounding District.

The seven-day strike of Pass butchers against certain regulations of the meat rationing system came to an end on Wednesday morning when all Pass butcher stores opened for business.

A meeting of all butchers was held at Blairmore on Monday evening when the matter was thoroughly discussed. It was agreed that nothing was being gained by remaining closed. It was pointed out that meat stores in Michel, Natal, Cowley, Lundbreck and Pincher Creek were open and that Pass citizens were patronizing these stores for meat. In the face of this Pass butchers were losing business and getting nowhere with their strike.

It was decided to keep closed on Tuesday in order that stores could have the opportunity of stocking up with fresh meat and open for business on Wednesday morning.

## THANK YOU!

I wish to express my grateful thanks to the Overseas Welfare Fund, for the monthly gift of cigarettes, to the Ladies Auxiliary, B.E.S.L., for their much appreciated Christmas parcels, and to the citizens of Coleman who contributed so generously to the funds of these two organizations and so made the gifts possible.

JOE DELUCA.

# WORLD HAPPENINGS BRIEFLY TOLD

Sir Harry Lauder, celebrated Scottish singer, marked his 75th birthday by singing his favorite songs for scores of guests who visited him.

German submarines which have been touring British ports have so far netted 15,609 (about \$25,240) for charities.

Ten-passenger helicopter planes will be used extensively throughout Scandinavia on feeder lines to Britain-Scandinavia Air Service, it was learned.

Congratulations were sent by the Air Ministry to the staff of Chelmsford gasworks which produced hydrogen for the entire London balloon barrage.

The German Embassy furniture, including the safe in which the Ambassador kept his private papers, was sold at public auction in Dublin on behalf of the United Nations.

A Lockheed Constellation transport plane set an east-west transcontinental flight record recently in eight hours and 39 minutes between Washington, D.C., and Burbank, Calif.

British shipyards have started to convert 10,000,000 tons of shipping from war to peacetime commercial standards and the job is expected to keep most shipyards busy until 1950.

Dome agency broadcast from Japan said that Japanese purchasing goods from American soldiers or exchanging goods with them would be liable to death or 20 years imprisonment.

To help civilians paralyzed by an injury or wound to the spinal cord, war veterans have formed an association to be known as the Canadian Paraplegic Association. One of its aims will be to foster and encourage vocational and professional training of paraplegics.

## Opinion Of Scientist

Believes Atomic Bomb Should Not Have Been Dropped On Cities

Prof. M. E. Oliphant, one of the pioneers in development of the atomic bomb, asserted that scientists who developed the weapon would not have used it as militarists and politicians did.

He predicted atomic energy would be used industrially within 10 years and that the nuclear energy eventually would replace all other forms.

He told a service club (Rotary) in Birmingham, England, he thought scientists were more horrified than anyone else when the bombs wrecked two Japanese cities.

"Scientists believed this weapon could have been used against Japan very effectively without dropping it on a city," said Prof. Oliphant, professor of physics at the University of Birmingham. "Intensive propaganda by wireless and leaflets would have warned the Japanese that one of these weapons would be dropped."

He said if this failed, the next step should have been to wipe out, for instance, one of the islands in Tokyo bay which were naval bases. He said a city should have been destroyed only as a last resort.

He said there was no defence against the bomb and described the idea that Great Britain and the United States, or any other countries, could control the bomb by keeping the process secret as "just rot."

The atomic bomb had the equivalent explosive force of 20,000 tons of TNT. He was confident that before long bombs could be made with an explosive force of 1,000,000 tons of TNT, and subsequently of 10,000,000 tons of TNT.

Any industrial country could have the bomb in five years and any determined industrial country could have it in two. Control of the bomb could only be brought about by some sort of mutual agreement.

## Using Peach Fuzz

United States Firm Requires Large Quantity For New Product

You have heard about packing houses utilizing every bit of the pig but the squeal.

Now it seems that every bit of the peach, including the fuzz, is to be put to use.

L. A. Boyd, New Troy horticulturist and officer of the Michigan Fruit Sponsors, Inc., has received a letter from a firm of industrial research chemists, saying it is developing a product that requires large quantities of peach fuzz. The chemist asked where large quantities of the fuzz could be purchased.

"I cannot estimate the fuzz available, but you would be surprised at the amount," Boyd says. "Seven or eight exchanges in this fruit belt operate peach defuzzing machines and end the day with a large supply."

## SHOCKING FIGURES

The Ottawa Journal says it is shocking to read that in Canada last year 311 children died of diphtheria, that cases and fatalities showed a marked increase over the two preceding years. It is shocking because immunization against diphtheria is harmless, effective, and everywhere available. Diphtheria could be made as rare as smallpox if we used against it the knowledge and means we possess.

**THESE NEVER DID MAKE THE GRADE**—Memo to Canadian screenmen in the Pacific. Relax, fellows. Those jungle coiffures never did make the grade. According to Canadian hairdressers, girl friends and wives aren't keen about those Burmese humps and spiral sideburns you disliked. "Hollywood is still the big influence," one expert stated. "Soft, romantic waves—the glamour stuff—that's our stock in trade." "Canadian girls are just a little conservative," another beautician said. "We haven't had one customer ask for native imitations." Casual hair-dos, going under titles such as "neat slants," "romantic height" or "top lock curls," are most popular with the young set. Curls are strictly passe.

## Caused By Weather

Watch Repairers Say Thunderstorm Will Cause Main-Spring To Break

If the main-spring in your watch is broken, the odds are two to one that a stray thunderstorm is to blame.

Leading jewelers in Columbus, Ohio, and watch repairers have aired their theory that main-springs break most frequently after a thunder-shower.

Sidney C. Howard, a watch repairer for 38 years, says that the rapid change in climate and atmosphere after a thunderstorm caused the main-spring to contract and break. The same thing sometimes happens to a pocket watch which is removed from a warm pocket and left to stand uncovered in a cold room during a winter night.

Robert Smith, public relations director for the Battelle Memorial Institute at Columbus, says that although the institute has not conducted any experiments along this line, metallurgists agree that a change in temperature affects metals. He adds that he found that upon placing a wrist watch on a cold window sill after it had been next to body temperature all day the watch usually stopped running but that the main-spring ordinarily did not break.

Clocks, however, escape the curious quirk of nature, jewelers say, because clocks have heavier main-springs than watches and are not affected by thunder-showers.

Another Columbus jeweller and watch repairer, Ruy Rhodes, explains that sometimes delayed reaction to the weather postpone breakage of a main-spring from one to ten days after a thunder-shower. He dismisses the widespread belief among laymen that main-springs usually are broken by being wound too tightly. He points out that most watches have safety devices which prevent excessive winding.

## Will Retain Food

Britain Will Stop Sending Food To European Countries

Britain will stop sending food to hungry European countries after current shipments have been completed, food minister Sir Ben Smith revealed.

He reported that Britain has on hand or en route only sufficient food to supply her own people. Britain had reduced her stocks to a minimum to keep the promise she made last March to send supplies to liberated countries.

"We can only do it once," he said. He disclosed that Britain will receive her first shipment of bananas in five years early in 1946 from Jamaica. The first oranges to arrive here since V-J Day are due from South Africa, he said.

Smith reported that Britain receives one third of her meat from Argentina.

## Dream House

New Home In Toronto Requires No Dusting And Has No Furnace

A one storey "dream" home which requires no dusting and has no furnace is nearing completion on Dale avenue in Toronto's swank Rosedale district.

Built by Mr. and Mrs. C. F. Woods who tired of renting houses after 20 years of married life, the L-shaped residence combines "radiant" heating with air conditioning and solar heating to keep rooms at desired temperatures. Principal heat is provided by iron pipes embedded in concrete floors.

To obviate dusting, the owners installed an electrical gadget known as the precipitator, which electrically charges dust and smoke from cigarettes while another part of the device attracts the charged particles.

A forest area, burned over once only, grows again, but a double burning destroys all the seeds and makes replanting necessary.

India is two-thirds the size of the United States. 2640

## SUNDAY SCHOOL LESSON

OCTOBER 7

### THE CHRISTIAN WAY OF LIFE

Memory Selection: Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind; and thy neighbor as thyself. Luke 10:27.

Lesson: Matthew 22, 36-39; Mark 12, 28-34; Luke 10:25-37. Devotional Reading: Colossians 3, 12-17.

The Text Explained: With Comments The Christian Way of Life is the Way of Love. A certain lawyer stood up and made trial of Jesus, sought to elicit from him an answer that could be used against him. He was not a lawyer in our sense of the term. The Abrogation Commentary thinks that Luke speaks of lawyers instead of scribes. The text used in the other Gospels, because Theophilus, to whom he was writing, would understand scribes to mean clerks. The scribe's question, "What shall I do to inherit eternal life, meant to him, What fasts, prayers, sacrifices are essential for him to obtain eternal life, for he was a Pharisee, and he was looking for his reward for spiritual acts. The phrase "eternal life" was in use among the Jews before Christ's times, and would be familiar to a scribe, but the New Testament enriches the content of the idea. "In the Synoptic Gospels it is regarded as a future possession to be had after death; thus here the lawyer speaks of inheriting it. In John it is already present experience of the people of God; and both in the Fourth Gospel and in John's Epistles it is presented to us as a spiritual condition, the divine life in the soul" (Walter F. Adeney).

In his turn Jesus asked the scribe, "What is written in the law?" How readest thou? Then the scribe quoted in reply Dt. 6.5 and Leviticus 17:18. In the incident recorded in Mt. 22:36-39 and Mark 12:28-34 (which is also assigned for our lesson today), it is Jesus himself who asks these two statements from different angles. The Pharisees and Sadducees cannot help surprise at finding that Luke credits a mere scribe with such acumen.

Jesus commended the scribe's answer and said, "This do and thou shalt live." The scribe, wishing to show that he had not asked a question so simple that it could be thus quickly disposed of, quickly said, "And who is my neighbor?" In Romans 13:8 we read, "He that loveth his neighbor has fulfilled the law," where the Greek words translated "neighbor" are "ton estera, the other," "the other" is a good definition for "neighbor." To teach the scribe this meaning, Jesus told him the parable which we call The Parable of the Good Samaritan.

## Canadian Was First

Raised Union Jack In Singapore Three Days Before Occupation

The first man to raise the Union Jack in Singapore after the end of the war in the Pacific was Lt.-Col. A. R. Stewart of Vancouver.

Col. Stewart, a paratrooper who had been operating in China, Burma and Malaya in the last 1½ years, parachuted into Singapore three days before its occupation by British forces. He commandeered a car from a Japanese general and to the cheers of Chinese spectators, he rigged the Union Jack on a flagpole.

## Charred Stone

Great Arch Of House Of Commons In London To Be Rebuilt

Every charred stone of the great arch that leads into the old blitzed House of Commons Chamber is being taken down and numbered carefully to be re-erected and incorporated in the new Chamber. Seared and scorched as it is, the arch will be a memorial of the night of May 10, 1941, when the House of Commons burned, and in some measure to the courage of all the members of the House who stayed and carried on the Government of Britain in defiance of German bombings.

It is said that 500 different kinds of materials are used for manufacture of shoes.

The Hindus plant sweet basil outside their temples and homes to insure happiness.

## LIFE'S LIKE THAT

## By Fred Neher

REG'LAR FELLERS—Absolutely Genuine, Nearly

**DEFEAT IS BITTER**—From the expression on his face, it really hurt this Jap officer to sign the surrender of Yokosuka naval base.

## Must Be Proved

World Should Know For Sure That Hitler Is Dead

There must be no cessation in the search for proof that Adolf Hitler is dead. First and foremost, the world must be satisfied that he is not hiding somewhere, to pop out at some opportune moment and try to rally the forces of aggression around him. There is, however, another danger that is almost more serious.

Unless proof of his death can be secured, the way will be open for impersonators to trade on his influence. There would be nothing to prevent some ambitious little man, a few years hence, growing a funny mustache and suddenly appearing, claiming to be the Fuehrer. That would bring Hitler to life in a very real way, for there would be thousands gullible enough to follow such a pretender.—Windsor Star.

## NO USE FOR ONE

Grover Cleveland Winth, of El Paso, Tex., recently notified us that the examining officer at a nearby army base asked a new man what his wife's name was. The fellow said he doesn't know. "What do you mean?" demanded the officer. "What did you call her?" And the new guy said: "Never had to. She was always there."

In the early 17th century it often took two years to make the round trip from Europe to China.

## THIS CURIOUS WORLD

## OUR COMPLETE SHORT STORY— GIRL FROM RANGOON

By ROSS BARGEY

McClure Newspaper Syndicate

Pete was stewed—ingloriously and ignominiously stewed. His expression was that of a dead halibut, and his careful progress resembled the stiff, ungainly gait of a mechanical man. He simply followed the direction of his toes—which led him unerringly to Babe.

Babe was, in every respect, the biggest thing in Pete's life. She stood fully eight feet to the shoulder and tipped the scales at upward of five tons—indications of very comely measurements, indeed, in a lady pachyderm. And the devotion of these two friends was a beautiful thing.

As Pete—squat, swart and unlovely—made his labored way through the circus camp, one instinct alone remained; Walk—till you've worked this off... or you'll wake up to find that you aren't even an elephant's nursemaid any longer!

But Pete craved companionship. He would annex Babe and compel her to stroll with him in the still of the night.

No doubt it was disconcerting to Babe to be rudely awakened at a time when all good elephants are asleep. Possibly she had been dreaming of her childhood days in India, where she'd roamed the jungle, a minor member of a noble harem, ruled over and guarded by a mighty sire. But she blinked her little eyes and followed Pete unquestioningly, somewhat annoyed, perhaps, by the odor of his cheap cigar. She must have guessed that something was wrong. There was no bustling activity such as attends the breaking up of a circus camp, no blare of band to herald a parade, in which Babe would pursue her lumbering pace, holding coyly to the tail of the elephant ahead. Did her keen intelligence hint to her that this per-

son leading her away into the night was Pete, and yet, in some mysterious sense, not Pete at all? How was the gentle, philosophical Babe to guess that the particular brand of sweeter Pete had imbued had drugged in him the Jekyll and brought into being the villainous Mr. Hyde?

As they moved ponderously into the night Babe undulated her prehensile trunk and rested it carefully upon Pete's shoulder, touching his cheek lightly with the delicate, finger-like tabs at the end. As the fumes of his breath reached her—offensive and unfamiliar, Babe halted in her tracks.

Pete, in no mood to brook opposition from so inferior a creature as an elephant, turned and showered her with thick-tongued abuse, tugging viciously at the big ear just within his reach. Still Babe refused to budge. And her continued resistance drove Pete, in his truculent frame of mind, into a frenzy.

Ordinarily he would have better judgment than to trifle with the dignity of a full-grown elephant, however gentle. But Pete was filled with the stuff that inspires the timid mouse to beat upon its breast and cry: "Bring on your cat!" Doubling up his horny fist he deliberately hung one on the only vulnerable spot in the howered head—the space between the eyes.

Babe backed away, whistling with surprise and displeasure.

A normal man would have realized that Pete's next move was practically the equivalent of writing his own epitaph. But Pete was now fully under the spell of the Hyde complex. Removing the cigar from his mouth he pressed the glowing end against Babe's sensitive trunk.

With a squeal of pain and rage, Babe's gentleness left her. She trumpeted a protest. It was Pete's good fortune, then, that Babe was not a member of the fierce African species, with the huge fanlike ears and cruel ivory bayonets. Babe was a girl from Rangoon, and her tusks, such as they were, had been removed.

Babe had never been a mother, but somewhere in the massive brain there lurked, apparently, a memory of the sort of punishment visited by mother elephants upon their rebellious offspring. Coiling her mobile trunk, she released it like a spring, delivering what probably seemed to her little more than a love tap, but which sent Pete sprawling and gasping, headlong in the sand. And Babe's slow ire still grew.

With his last remaining ounce of strength Pete rolled over on his back and lay in the eerie light of the approaching dawn staring up into the angry little eyes—breathing, no doubt, his own particular version of "No I Lay Me." But his punishment was not complete. Grasping with those fingerlike tabs the burning cigar from where it had fallen, Babe pressed the fiery tip against the cheek of the unhappy Pete.

Scarcely had she done so, but now sober, Pete felt himself being lifted in the coil of that terrible trunk. At the memory of a similar occurrence he had once witnessed, Pete passed out in a cold sweat.

Babe seemed to realize at once that the hateful stranger who had treated her so inhumanly had now left her friend's body. With this knowledge her rage vanished. True enough, Pete seemed to have gone temporarily "mushy," but that was all over now. Moreover, he appeared to be ailing, and was possibly in pain.

Elephants are known to be very sympathetic. Babe had had her own miseries from time to time—and she knew what to do. Swinging Pete's limp body aloft in the coil of her trunk, she tenderly bore her poor, sick keeper straight to the circus vet.

## Important Discovery

Flexiglass Being Used In Peacetime Production Under New Name

One of the United Kingdom's war discoveries was Flexiglass—an unbreakable, flexible, transparent, glass-like material used in the manufacture of bomber windcreens. This same material will now be applied to peacetime production under the name of "Perspex." Already manifold household goods are being produced from this material, including complete bathroom, electrical and kitchen equipment, picture frames and even furniture. Instead of corrugated iron, Perspex glass may now be used for roofs. Jewellery, tops and wireless casings are also being made out of this attractive material.

## First Casualty

A Navy aviator in the Pacific got a chunk of AA flak in his neck, and after he'd recovered in the hospital, his friend asked how he'd felt when he got hit.

"Didn't feel anything at first," he said. "Then how, they asked, did he know he was hit at all?"

"Well, I looked to my right and saw a fresh hole in the fuselage. Then I looked to my left and there wasn't any exit hole. So I had a pretty fair idea where that flak had stopped."

The first reported injury of an American soldier since occupation of southern Korea was recorded when it was disclosed a sentry suffered the loss of four fingers when he opened a booby-trapped fountain pen in the governor-general's palace at Seoul.

Penetrates deep into bronchial tubes with its soothing medicinal vapors.

Stimulates the chest and back surfaces like a good, warming poultice.

Warning, soothing relief—grand relief—comes when you rub good old Vicks VapoRub on the throat, chest and back at bedtime. Its penetrating-stimulating action keeps on working for hours. Invites restful sleep. And often by morning most misery of the cold is gone. No wonder most mothers use VapoRub.

Try it tonight—home-proved VICKS VAPORUB

## SMILE AWHILE

"The genuine ivory carvings you sold me last week turned out to be imitation."

"I can't understand it—unless the elephant had a false tooth!"

Husband: "What extravagance! You have two hats to match that one dress."

Wife: "Oh, no, I haven't. I've only one dress to match the two hats."

Tommy: "My teacher got the worst memory in the world."

Father: "So he forgets everything, does he?"

Tommy: "No, he remembers everything!"

"Lost your job as a caddy?" asked one boy.

"Yes," replied the other. "I could do the work all right, but I couldn't learn not to laugh."

"You want to wed my daughter? My answer depends on your financial condition."

"What a coincidence! My financial condition depends upon your answer!"

"He thinks he's Henry VIII, doctor. Is that serious?"

"Not unless he thinks you're Ann Boleyn."

First Wife: "Is your husband a book worm?"

Second: "No, just an ordinary one."

Teacher: "Lot was warned to take his wife and daughter and flee out of the city. Lot and his wife and daughter got safely away."

Student: "What happened to the flea, mam?"

Teacher: "Now, Tommy, tell me where elephants are found?"

Tommy: "Elephants are such very large animals they hardly ever get lost."

First Workman: "Where is Bill today?"

Second Workman: "In 'ospital."

First Workman: "Wat 'appened?"

Second Workman: "E came down a ladder ten minutes after it was taken away."

He: "See that big substitute ballplayer down there on the bench? I am sure he'll turn out to be our best man."

She: "Why, you darling! Isn't this rather sudden?"

## A FREAK ACCIDENT

A man in St. Helen's, Lancashire, getting out of his car to investigate a suspected fault, was hit and knocked down by the rear wheel which had fallen off and spun along behind.

—Bishop in the St. Louis Star-Times.

**A COUNTRY EDITOR LOOKS AT**

## OUR CANADA

BY JIM GREENBLAT

◆ Here and there items: In Dundalk, Ont., a New-4000 woman at a family reunion got first prize for best throw with the rolling pin, her husband outdistanced all others in the 100 yard dash. . . . Mrs. Lorne Rivett of Amnrior, Ont., has really got luck in sight, found a six-leaf clover one day and a seven-leaf the next, while most of us get panicky finding a four-leaf specimen. . . . The labor shortage in Neepawa, Man., district, according to The Press finds wives and daughters working in the fields as well as German prisoners of war and Indians. . . . The death of John M. Stevens, K.C., at Edmonton, N.B., 82, recalls he was one of the first lawyers appointed King's Counsel after the death of Queen Victoria. . . . George Pocock, the man who discovered that there was coal in the Estevan district, died in his 86th year. . . . A bee got into a car on No. 27 highway near Brampton, Ont., the car struck a tree, caught fire, was destroyed and three occupants hospitalized with injuries. . . . Justice isn't so slow at Indian Head, Sask. A truck was stolen, recovered and the thief sentenced to one year hard labor, all within five hours. . . .

◆ Who's afraid of the big bad wolf? Not out here, says the Hanna, Alta. Herald, of a local woman. A coyote entered the farmyard, selected a 20 lb. turkey gobbler and was decapitating just as the woman came out of the house. She jumped on her bicycle, but on reaching a fence got off and continued the chase on foot, overtook the thief, and grabbed the gobbler out of the jaws of death. The coyote yelped, stared at her audacity and leaped away. The gobbler would be getting it in the neck later, says woman. Woman prefers to remain anonymous.

◆ Says the Alaska Highway News: "We want no narrow sectionalism, no nationalism based upon creed, language or race. But we want everyone in this land to become a citizen of the great Canadian people."

◆ The Rosemont, Sask. Eagle muses that with all their faults—and young people have plenty of them—and with all the tragic experiences you read about, young people today are as intrinsically fine and as fundamentally forthright and decent as they ever have been. And they are more quickly responsible to the call of an ideal, and its worthy adult influence, than young people have ever been. Their very frankness presents to the church, the school, the home and to public life an opportunity without parallel in Canadian history."

◆ In Swift Current, Sask., pop. 6,500, the churches got together and found a Council of Churches of all creeds. They made a survey, and found that 500 children never go to Sunday school, and have undertaken an advertising and personal campaign to get them out to S.S.

◆ Here's a fine post-war thought from the columns of the Gananoque, Ont. Reporter: "Just as soft home life softens men for war, selfish home life softens men for war, selfish home wives, and children can train to-morrow for the adventure of a new home life. With the boys home, and the first of reunion over, our families need not settle back to the dullness of petty quarrels that lead to broken homes. New homes will fashion the new age. Every husband and wife, son or daughter, has a part. They can train themselves to snap instead of snapping back. They can train themselves to think of each other instead of themselves. Every victory they gain in these daily

## Quality Guaranteed

# "AA" TEA

usses with self-will, is a brick in the new structure of new families and a better world."

◆ What about our woman in the post-war world? The Midland, Ont., Free Press took a survey and found that majority do not want to be career women. Single women when they get married want to keep house, and give up their jobs; married during the war, some wanted to keep working while for a stake. A few believed if there were no children in the home, it was better to keep on working. The consensus of opinion among engaged girls was that they would quit work at once when married. One cynical girl intended to keep on working and make "lots of money," as marriage didn't appeal to her. Many realized their positions in the working world was precarious, with veterans returning, but intend to keep it at as long as they can.

◆ Waiting for an income tax refund is like waiting for death. You know it will come, but you get awfully grey waiting.—Picton, N.S., Advocate.

## Giant Warships

New United States Warships Too Big For Panama Canal

The United States Navy's new 45,000-ton aircraft carriers, biggest warships afloat, are too hefty to pass through the Panama Canal. In order to reach the Pacific they must round Cape Horn or sail east.

Confirming this fact, naval sources said it is not a case of a man building a boat in his basement too big to take through the door. It is simply recognition that the canal, as a controlling factor in naval construction, is outmoded.

The three benchmarks are the Midway, already commissioned; the Franklin D. Roosevelt, launched but not commissioned; and the Coral Sea, still under construction.

Supplemental treaties, begun before the war, but not completed, will eventually permit the carriers to get through the canal.

## Counter Weapons

Produce Projectiles Capable Of Destroying Planes Or Rockets

The London Daily Express said that British and United States scientists have developed counter-weapons to the atomic bomb which are in advanced stages of development.

Chapman, Fitcher, the paper's science writer, reported that the principles of British radar, German rockets and American fuses were being combined to produce projectiles capable of destroying planes or rockets, carrying atom bombs while they are at great height. He said the new defence weapon also would destroy the mechanism of the atomic rockets or bombs before they exploded in mid-air.

## SELECTED RECIPES

### PEARS ARE PLEASING

At this season one need look no further than the nearest fruit market for inspiration in planning meals that will please the family. There quantities of rosy-cheeked pears meet the eye and immediately the housewife can think of several ways in which this popular fruit may be served. For breakfast, pears baked or sliced raw over the crisp morning cereal is a treat. For luncheon, fresh pears stuffed or coated with cream and Roquefort cheese mixture and served with a few simple accompaniments, contribute to a smart menu for the club group. For the dinner cocktail, diced fresh pear and balls of melon meets with universal favour, and as for desserts, there are several which will start the gourmet's talking. There is the simple matter of covering stewed chilled pears halves with a rich chocolate sauce or this custard. A slight variation of this same theme is Crusted Pears in which the bland quality of the pears combines to advantage with crisp cereal—and with very little sugar. You'll like pears better than ever prepared this way:

### CRUSTED PEARS

3 fresh pears  
1 tablespoon lemon juice  
1 cup honey  
1½ cups over-popped rice cereal  
1 tablespoon butter  
1½ teaspoon nutmeg.

Pare fruit and cut in half lengthwise; remove core. Dip halves in mixture of lemon juice and honey. Roll in cereal which has been crushed into fine crumbs. Place in greased baking dish, cut side up. Dot with butter and sprinkle with nutmeg. Bake in moderately hot oven (400 deg. F.) about 55 minutes or until tender. Serve pears hot or cold with Custard Sauce. Yield: 6 servings.

For a fire sometimes travels faster than deer can run. 2640

PRIZE STUDENT—John Hanson

Flett, son of L. M. Flett, C.P.R. agent at Neudorf, Sask., has been awarded one of two scholarships provided annually by the Canadian Pacific Railway to its employees under 21 years, or minor sons and daughters of its employees, carrying up to five years' tuition at McGill, Montreal. The Neudorf student attended public schools at Fort William, Ont. Kelloe and Rosenfeld, Man., and high schools at Neudorf, Neudorf and Neudorf, and recently completed a six-weeks' summer course at Saskatoon. He averaged better than 88 per cent, in Grade 12 exams, and is enrolled for engineering at McGill.

## Military Training

Says It Should Be Placed On A Voluntary Basis

Dr. Sidney Smith, president of the University of Toronto, said representatives of five universities—McGill, Queen's, McMaster, Western and Toronto—met here Sept. 8 and decided to recommend to their governing bodies that participation in any military training program be placed on a voluntary basis. Military training has been compulsory in Canadian universities since 1941 under the Resources Mobilization Act.

## This Week's Pattern

By ANNE ADAMS

Can't begin to sing the praises of this lovely, slenderizing frock! Pattern 4934. Princess-line panels may contrast or match; are easy to sew and fit. Leaves are embroidered.

Pattern 4934: 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48. Size 34, 2½ yds. 39-in.; 1½ yds. contrast.

Send twenty cents (20c) in c.m.s. (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 1175 McDermott Ave. E., Winnipeg, Man.

## MORE VITAMIN A

Several factories have been built in Ceylon for the manufacture of shark liver oil which contains three times as much vitamin A as cod liver oil, and investigations are being made as to its preservation and concentration.

## Citizens Asked To Pay Attention To Instructions

This week a few citizens have been taking their bundles to various sub-units throughout town. However, the large majority are evidently awaiting the visit of the collectors with trucks.

A couple of trucks will be sent Monday morning to the outlying districts such as the Lime Kiln, Sentinel and Willow Drive, and it is earnestly requested that the citizens of these districts have their bundles ready so that they will be able to come back within a reasonable time and take part in the town collection.

Citizens are urged to wrap their clothing into bundles and place these on their verandahs before 9 a.m. Monday. Shoes should be tied together in pairs. Types of clothing desired include blouses, aprons, overcoats, packets, scarves, footwear and blankets. Although clothing need not be in perfect repair, it must be useful to all the people who receive it. All types of washable garments should be washed before they are given to the collection, but need not be ironed. Other garments should be clean and sanitary, but need not be dyed before being contributed.

...V...

## Will Endeavor To Complete Drive Monday

Citizens Asked to Place Bundles on Verandahs and so Aid Collectors; Collectors to Call During Hours 9 a.m. to 5 p.m. Monday.

Coleman's National Clothing Drive collection committee will endeavor to clean up all collections on the one day. They will take advantage of the Thanksgiving holiday to get an early start at 9 a.m. Monday and continue through till supper time at 5 p.m. Should the drive be incomplete on Monday it will be cleaned up on the Tuesday evening between the hours of 5 and 7.30.

Collection chairman Adam Wilson plans on securing a fleet of trucks and men with high school young men. Collections will be made from all zones at the one time.

Citizens are asked to co-operate with the collectors by having their clothing bundles ready and when possible to leave them on the verandah. In this manner the collector requires only a minimum of time to pick them up. Those planning on being away from home on Monday are asked to leave their bundles outside the door.

They have literally

# Nothing to Protect Them

WHAT CAN YOU SPARE THAT THEY CAN WEAR?

WITH winter close at hand, countless thousands in war-torn lands have no clothes, no bedding, no footwear. If you have serviceable discarded clothes in your closets—turn them out, without delay, and hand them in at any Post Office or Collection Depot, today.

## NATIONAL CLOTHING COLLECTION

OCTOBER 1 to 20

## Town of Coleman--Proclamation

WHEREAS as many war victims have died from exposure and lack of adequate clothing as have died from starvation, and

WHEREAS of those remaining alive, more than 30,000,000 are virtually naked, and more than four times that number, 125,000,000, are in desperate need of clothing, and

WHEREAS since enough new clothing for the relief of these unfortunate people does not now exist anywhere in the world, and WHEREAS the Canadian Government has authorized a nationwide collection of all serviceable used clothing which does not have to be replaced by new for the donor's own use, and

WHEREAS Canadian Voluntary War Relief agencies have agreed to suspend their national and local campaigns and public collections of clothing during September, October and November, 1945, and

WHEREAS full campaign support has been pledged by the national leaders of every representative and responsible group in Canada, and

WHEREAS a local committee to conduct the National Clothing Collection in Coleman has been formed, Rev. G. A. Kettle has been named chairman of the committee, and the clothing receiving station has been established next Aboussafy's store,

NOW THEREFORE, I, N. E. Aboussafy, Mayor of Coleman, do proclaim October 1 through October 20, 1945, as National Clothing Collection weeks in Coleman and I call upon every responsible organization and every citizen of this community to give utmost help in this urgent and humanitarian undertaking.

(Signed) N. E. ABOUSSAFY, Mayor.

**Clean Out Your Clothes-Closet Week**

All across Canada clothes closets and attics are being turned out this week—to provide clothing for the destitute and needy in war-torn countries. Get out all the serviceable, used clothing, old blankets or footwear you can spare—at once. The need is desperate.

**NATIONAL CLOTHING COLLECTION**

**WHAT are you giving to the NATIONAL CLOTHING COLLECTION**

For needy, destitute people in war-torn lands, serviceable used clothing, blankets and footwear are urgently needed. Winter is at hand. Prompt action is essential. Clean out your closets today and hand in the biggest bundle you can to any Post Office or Collection Depot.

WHAT CAN YOU SPARE THAT THEY CAN WEAR?

## Salvage Your Clothes to Salvage Their Lives

Salvation for millions of suffering war victims is to be found in the closets, attics, drawers and trunks of the Canadian people. Discarded clothing—outgrown, outmoded, long-forgotten and unworn—can bring untold relief to the stricken people of war-ravaged lands—millions of whom are literally naked. A concerted drive is now under way, by the National Clothing Collection for the relief of war victims, to make it easy for you to give help where it is most needed.

In Europe alone, 125,000,000 men, women and children, 30,000,000 of them children, are in dire need of aid. When the ruthless Nazis overran defenceless countries, they left destruction and desolation in their wake. Many of the hapless victims were left only with whatever clothes they happened to be wearing. These meagre coverings have long since worn threadbare.

Reports that have come out of war-devastated countries are heart-rending. Confirmed stories tell of countless deaths due to exposure . . . of seven people sharing a single shirt . . . of feet wrapped in newspapers for lack of shoes . . . of children ravaged by illness and disease due to inadequate clothing for their emaciated bodies. All are in desperate need of clothing, shoes and bedding. Unless these needs are filled, the indiscriminate visitations of weather will take a greater toll of human health and human lives . . . adding to the huge total attributable to sadistic oppressors.

These people are our friends and allies. By extending help to them now, we not only give them warmth of body, but also the inner warmth of heart that comes with the knowledge that they have not been forgotten. By helping them, we help ourselves . . . for with adequate clothing and regained self-respect, these fellow world-citizens can go on to rebuild their part of a war-shattered world.

The drive is set for the period of October 1 to 20. Go to it now. Pack your contribution in a bundle so that yours will be ready when your local collectors call. Durable, wearable clothing; shoes; clean used blankets; infants' and children's wear; knitted caps . . . everything usable will be welcomed as heaven-sent!

# PTE. W. CIESLAK FAILED TO RETURN HOME

Mr. and Mrs. Frank Balayewech met with disappointment on Friday last when they journeyed to Calgary to meet their son, Pte. Walter Cieslak, only to find that he had

not arrived from overseas. Mrs. Balayewech, Walter's mother, had received an official telegram stating that her son was due to arrive in Calgary on the Friday. With her husband she journeyed to the city only to meet with disappointment. The local

branch of the Canadian Legion also received word from Calgary that Pte. Cieslak was among those arriving on Friday's train.

Both his parents and Mack Stigler received letters from him in Holland, written on Sept. 11. In his parents' letter he had remarked that he did not know when he would be home, but hoped it would be before Christmas.

## The Churches

ST. PAUL'S UNITED CHURCH  
G. A. Ketylis, Pastor  
Sunday, Oct. 7:

This is Rally Day in our Sunday school. Morning service at 11 a.m. conducted by the Sunday school teachers and scholars. Each scholar is invited to bring a garment and deposit same in "The Gift Box" provided for contributions to National Clothing Collection. The Sunday school invites all adults to attend.

Evening worship 7 p.m. This evening service will be a Thanksgiving service. There will be Old Favorites sung, special instrumental music, a brief address. A social hour with lunch will follow. You are cordially invited.

ST. ALBAN'S CHURCH  
Rev. W. E. Brown, Rector  
Daily offices:

Mattins 9 a.m. Evensong 7.30 p.m.

Friday: Choir practice 7 p.m.

The 19th Sunday after Trinity: Young people's service 2 p.m.

Evening service 7 p.m.

Altar flowers Sept. 30 given by Mr. and Mrs. Gerald Clarke and Geraldine; Mr. and Mrs. J. Houghton and Dale in memory of Elizabeth Watson.

There will be a special service for all our young people on Sunday, Oct. 28, in St. Alban's, 11 a.m.

MR. and MRS. E. V. STEELE  
S.A. GUEST SPEAKERS

Former well known Pass citizens, Mr. and Mrs. E. V. Steele will be the guest speakers at the Salvation Army service next Sunday evening at 7.30.

Mr. Steele will be remembered as the agent for Metropolitan Life before leaving the Pass for the east. Shortly after leaving the Pass they took up missionary work and in 1941 left Canada on an assignment overseas. They sailed on the Zam Zam, which was torpedoed by a German submarine. Both were taken prisoners, Mrs. Steele being later released during an exchange of prisoners. Mr. Steele was only recently released after being a prisoner of war for four years.

Their addresses will be most interesting and the Pass public is invited to the service.

Your Canada needs millions, what is your share? Buy Victory Bonds.

# Horse Processing Plant To Open Soon

The Horse Co-operative Marketing Association hope to have their Swift Current, Saskatchewan, plant in operation very shortly. The secretary organizer, S. F. Shields, says that the plant is rapidly nearing completion and will be ready for a test run of 300 horses. This test run will be for the purpose of determining the quantity of meat and by-products to be derived from all types of horses. Because initial payments to the producer are based on fleshy condition, the basis of live grading will be determined by the meat recovery on the test run. The initial payment to producers will be two cents per pound live weight for well fleshed horses with further payments in the form of patronage dividends.

Many thousands of horses have been listed with the Co-operative in the last few weeks. Listings have come from nearly every town in Saskatchewan and from many in southern Alberta.

The purpose of listing horses with the Horse Co-operative Marketing Association is twofold. Because there are over 200,000 surplus horses in Saskatchewan alone, it is necessary to have some sort of quota basis for shipments to the plants at Swift Current, Sask., and Edmonton, Alberta. In this way all producers have an equal chance to dispose of their horses and the drought areas can be given some preference in the face of the serious feed situation. The other purpose of listing is that producers who assist in enabling the Co-operative to raise its financial objective of \$100,000 and subscribe loan capital can be given priority on shipments. This is being achieved by producers buying one share in the Co-op at \$1 for every head of horses they wish to list for sale to the Co-op. This then enables the Horse Co-operative Marketing Association to pay off the \$50,000 loan guaranteed by the province and put all the assets in the hands of the producer members. The Co-op is a non-profit organization and only those who ship horses through the plants will get the benefit of patronage dividends. Anyone who has not already listed their surplus horses are urged to do so now, says Mr. Shields.

## UNEMPLOYMENT INSURANCE

Claimants for unemployment insurance who decide to accept jobs in other than their usual occupation will have their application for unemployment kept alive so that when employment opportunities suitable to their own particular skill or qualifications arise they will immediately be informed of them.

The cancellation of war contracts and the consequent mass layoffs

from war plants have created a situation where some workers may have to accept employment in their pre-war or secondary occupation until such time as industry is re-established on a permanent, peace time basis. However, offices of the national employment service will continue to give applicants for employment every attention and assistance in finding them jobs for which they are best suited.

In regard to unemployment insurance where claimants prefer to accept jobs rather than draw benefit, they will not be penalized if later they leave voluntarily because the employment proves unsuitable.

## Local News

Mrs. John Burns is expected home from Calgary this week end.

Mrs. J. Kinnear sr. recently spent a few days at Midnapore and Calgary.

Miss Margaret Dorusak has returned from a vacation spent at Castlegar, B.C.

Miss Emily Hirsch, of Nelson, is the guest of her sister, Mrs. Ronald Jackson.

Mr. and Mrs. A. Gettman visited last week at Lethbridge, Shaunessy and Macleod.

## To donors and others who have contributed in any way to the RED CROSS WARTIME BLOOD DONOR Service

in Alberta Division Clinics:

Dear Friends:

This letter is to say "THANK YOU!"

The volunteer Blood Donor Service of the Canadian Red Cross Society was established on January 29, 1940. Since that time, we have received over 2,300,000 blood donations in Canada. As we are now closing the service from a war "standpoint," we would like to express to you our sincere appreciation for the blood donations you have so generously given.

There is always a joy in doing something for another but there is a special joy when it means the saving of a life. This Service has been the means of saving the lives of hundreds of our men in the Army, the Navy and the Air Force; so you, by your co-operation, have had a part in it. We know this thought will fully repay you.

Now regarding the future. It is most unfortunate that many deaths occur in the hospitals in Canada annually because of the lack of a proper transfusion service. The Red Cross is an organization of mercy and we are now surveying the field in Canada with a view of setting up a service to provide blood for transfusion purposes in all hospitals.

It is anticipated that it will take at least three months to complete the survey; so we again say "Thank you" for your assistance during the war period and we most earnestly request that you join with us when the new service is established in continuing to play a part in the saving of human life—something so dear to us all.

Yours sincerely,  
DR. R. C. RILEY,  
Chairman, Blood Donor Committee.

## Roughhead Lost To Davis Cup Star In Tennis Tournament

Went Into Final of Armed Forces Singles Tennis Tournament Before Admitting Defeat to McDiarmid of Canada 6-2, 6-1, 6-3.

Chick Roughhead has local tennis players grinning in amazement at his wonderful feats on European tennis courts. Chick has been sweeping aside all opposition and recently at Hilversum, Holland, when he entered the Allied Tennis Championships it took a Davis Cup star to defeat him in the finals. To give one an idea of the importance in which the tournament was held, Chick states that army and air force personnel were flown from Britain to take part in the tournament.

Chick won his quarter-final match against a player named J. J. Inglis, 6-1, 6-1. He won his semi-final match against B. Harrison, 3-6, 6-2, 6-3.

He was delighted with the brand of play displayed in the tournament and commented on the fact that two professionals watching

the games came over to question him on why he did not play the net as it was their opinion that his ground game was every bit as strong as McDiarmid's and that had he played the net more the score would have been much different.

Today Chick's tennis trophies include a diploma, a silver leaf, a medal, a shield and one other prize which he has yet to receive.

He remarks that the tennis is now over and that he is scheduled to go back to his unit to England and possibly Canada. From present indications he hopes he may still be home for Christmas.

He enclosed a picture showing himself along with team members at Hilversum.

## Sports Talk

### HOCKEY

Now that the wars in the west and east are over there is no reason why winter sports in small towns, such as Coleman, should not take a new lease on life.

In Coleman only Pee Wee and juvenile hockey has flourished and that is mainly due to the attention given these youngsters by Ray Spillers and his aids.

Intermediate and junior hockey leagues should be revived this winter. The public has been hockey starved for four or five years and with fair teams support would be forthcoming in good attendance.

There shouldn't be much difficulty in securing good juniors as the Pee Wee league has been fostering some exceptionally talented players. They should be just about ready for junior ranks. The intermediate team could be comprised of some of the older players who donned hockey uniforms prior to the war and who could give a steady influence to the youngsters who might wish to try out in intermediate ranks. Let's have some interest in hockey's revival in Coleman this coming winter.

### CURLING

A few curlers are at the curling arena nightly constructing some improvements. The interior walls are being boarded to the roof and between the exterior and interior boards wood shavings are being placed to afford insulation.

A concrete wall is being placed alongside the wall which stands against the hillside. Rocks have been sliding against the wall and through time the pressure would cause damage to the side of the

arena. The concrete wall will act as a permanent guard against damage of this nature.

Insulating the arena is quite a big job for the few men doing the work and an increased crew could complete the job quickly. President Itt Dow has several improvements in mind and they could be accomplished this fall if only more men would turn out once or twice a week to lend a hand. Come on, boys, get up to the arena and help.

## "MACDONALD BRIER" SLATED FOR SASKATOON IN 1946

Mr. Thomas Rennie, chairman of the board of trustees for the MacDonald Brier Curling Tankard, announces that the Dominion championship playdowns will be resumed in 1946 and Saskatoon, Sask., will be the next venue of the curling classic on March 4, 5, 6 and 7.

Cancelled in the late fall of 1942 for the duration of the war, this will be welcome news for the devotees of the roarin' game across Canada. The last meeting was in the old City of Quebec in March of 1942.

Your Canada needs millions, what is your share? Buy Victory Bonds.

## It's the man who looks ahead who gets ahead.

GOOD management . . . essential to successful farming, as to any business enterprise . . . is largely a matter of timely marketing and careful spending . . . waiting for the time when it is most favourable to buy.

We all want things now . . . things we have not been able to get for the past several years. Some of these things are necessities . . . some are things that will contribute to our comforts and pleasures.

Eventually, these things will be more plentiful. By waiting a little longer we will help to keep prices of things we need at lower levels and we will buy at better advantage when we do buy.

Meantime we can invest our savings in the safest securities obtainable . . . Victory Bonds. More Victory Bonds will be offered this Fall. They pay 3% interest . . . double bank interest . . . and they are "liquid capital".

If we need cash in an emergency any bank will buy Victory Bonds at any time. And any bank will loan money on Victory Bonds.

The Ninth Victory Loan will be our last opportunity to buy Victory Bonds for a whole year, so buy double this time—the same rate of savings as in previous loans will pay for twice as many bonds over the 12 month period.

## FARMERS CAN BUY VICTORY BONDS ON CONVENIENT DEFERRED PAYMENTS THROUGH ANY BANK

... just sign a short form letter which Victory Loan Salesmen carry (banks have copies) ordering the bank to buy Victory Bonds for you. Pay 5% when ordering and the balance at any time during the next 12 months. The interest the bonds earn pays the interest on the bank loan.

The Pick of Tobacco

## Radar

SCIENTIFIC PROGRESS was swift during the war, and there were many phenomenal developments in that field. Some of them will prove to be of value only for purposes of war, but others will have important peacetime uses. One of these is radiolocation, better known to the public as "radar". One of the most closely guarded secrets of the war, radar is generally believed to have contributed more than any other scientific factor to the Allied victory. The British Ministry of Information has recently published an interesting pamphlet on the history of this device, which it described as "the most novel and versatile weapon of the century". Originally designed for defense, radar proved also to be a powerful weapon of offense, and it is predicted that it will be "as valuable in peace as it has been revolutionary in war."

Had Many Uses  
In War At Sea

Radar played a large part in the success of the decisive Battle of Britain. In this connection, Air Chief Marshal Sir Arthur Tedder has stated "If radar had not prevented the Germans from obtaining the element of surprise in the raids on England, I hate to think of where we might have been." Early in the war it was used for the location of enemy planes in the skies over, and approaching England, but later radar was made available for many other purposes. In naval warfare it was used to make possible the bombing of ships at sea, regardless of fog conditions. It was also used to perfect the "blind fire" technique in naval gunnery, and it proved invaluable in the detection of enemy ships, submarines and planes at sea. Many lives were saved by the use of radar in "air-sea rescue" operation and on "D" Day it was a highly important factor in the success of that great amphibious operation.

Tribute Paid  
To Canadians

In the closing months of the war in Europe, radar was used to overcome the effectiveness of the first flying bomb, and it was about to be successfully employed against the V-2 weapon, when Germany's collapse ended that menace. Now that it is no longer required for war, radar will still be used for many purposes. It will remove many of the hazards of air and sea travel during foggy weather, and it is believed that it may be put to use on motor highways to cut down the number of traffic accidents. Radiolocation was discovered and developed by British scientists, but credit is given by them to Canada's part in its success. In the manufacture of radar equipment and the training of highly specialized technicians, many thousands of whom served in Britain, Canada has made an important and valuable contribution to this great scientific development.

## The Kindly Way

## Value Of Friendship

## Abraham Lincoln Convinced Man He Was Unfit For Job

Abraham Lincoln once found it necessary to repulse the efforts of a certain entirely unworthy and incompetent application for the post of doorkeeper of the House of Representatives. But the President repulsed him gently and whimsically, without hurting his feelings, in this manner: "So you want to be doorkeeper of the House, eh?" "Yes, Mr. President." "Well, have you ever been a doorkeeper? Have you ever had any experience in doorkeeping?" "Well, no actual experience, sir." "Any theoretical experience? Any instructions in the duties and ethics of doorkeeping?" "No, sir." "Have you read any text on the subject?" "No." "Have you ever conversed with anyone who has read such a book?" "No, sir; I'm afraid not, sir." "Well, then, my friend, don't you see that you haven't a single qualification for this important post?" said Lincoln, in a reproachful tone. "Yes, I do," said the applicant, and he took leave humbly, almost gratefully.

## Wonder Drug

## British Doctors Cure Many Ills With Penicillin

The Manchester Guardian, England, reports another remarkable success in the use of penicillin, this time as a cure for infanzal meningitis. United Kingdom doctors have already successfully used the British "Wonder Drug" to cure a large number of cases of pneumonia, diphtheria and streptococcal infections. The germ of infanzal meningitis, however, was hitherto regarded as invulnerable to penicillin. Nevertheless after Manchester doctors had used it on a child suffering from the illness he responded almost completely, ultimately making a complete recovery.

## Mineralized Waters

## Royal Commission To Study Development Of Waters Of Lake In Saskatchewan

The medical benefits and commercial possibilities of the development of the highly mineralized waters of Little Manitou Lake, near Watrous, Sask., have been made the study for a royal commission by the Saskatchewan Government.

Four will make up the commission: J. G. Rempel, University of Saskatchewan scientist; W. A. Ridd, provincial laboratory director; Dr. B. Brachman, Regina, and Dr. W. P. John, Vancouver. Little Manitou Lake waters have been noted for their buoyancy and for reported health-giving qualities in rheumatic and skin diseases. Mineral salts extracted from the lake's waters have been sold commercially through drug stores. More than 15 years ago a company began exploitation of the great mineral bed under the lake waters but development halted because of financial troubles.—Financial Post.

The only exception to the law requiring signing one's name in official documents in England is the royal family, who sign only their baptismal names. 2640

Price Control  
And Rationing  
Information

Q—We are being asked to keep the labels and sales slips off any merchandise we buy in case we have reason to complain about high price or poor quality. How do I go about registering a complaint?

A—First you should do what you have always done—discuss any unsatisfactory merchandise with your retailer. If he feels it is in order, he will make an adjustment for you and take the matter up with his supplier. If, however, the retailer or his customer do not feel they are satisfied with the results of this discussion they can give the facts to the local office of the Wartime Prices and Trade Board for further check.

Q—I have to have special meat in my diet. Can I get more meat coupons for this purpose?

A—Yes, however you must have a doctor's or hospital's certificate which must state on it the amount of meat you will require for your special diet. This should be sent or taken to the nearest ration branch office.

Q—Our church group wants to make over some adults clothing into children's clothing to be sent to the UNRRA clothing drive. Could you tell us where we could get tips on how to make over cast-off clothes?

A—"Remake Winkles" is a booklet which will give you many valuable suggestions in the making over of clothing. You may obtain this guide book if you write to the Consumer Branch, Wartime Prices and Trade Board, in your province.

Q—Some friends tell me I can get dairy butter without any coupons. Is this correct?

A—No. Dairy butter is rationed the same as creamery butter. One coupon entitles you to half a pound of butter.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in our province.

## Good Property To Have

## Large Numbers Of People In England Are Buying Farms

Quite a few English farms are being bought just now and at very stiff prices. There is evidently a pretty general idea in Britain that land is good property to have, and no sooner is a good farm put on the market than it is very quickly purchased. Land as a producer of food has so demonstrated its vital necessity that a great many people have now a new desire to own land.

The use of liver to cure night blindness was mentioned in scriptures written before the Christian era.

## IN CANADIAN FORCES

Total Of 13,611 From United States Enlisted In Canada

A total of 13,611 men and women came from the United States to enlist with Canadian forces—more than 60 per cent, of them with the R.C.A.F.—in the second Great War, a compilation by the three services showed.

The figure represents those who, on enlistment, gave the United States as their permanent residence. Many of them may have been Canadian-born, but services officials are prone to cancel that off against the numbers of American-born men and women who left homes in Canada to serve.

Of the total, 8,585 enlisted or were commissioned with the R.C.A.F., including 129 who served with the women's division. Up to the end of July, 1945, 3,789 men and five women had been discharged from the R.C.A.F. to join the U.S. forces.

The army enlisted 4,740 American residents, including 547 C.W.A.C.s. There is no exact record of how many of them transferred to the U.S. forces at the time of Pearl Harbor or thereafter.

The nearest figure is that of 1,160, which represents the number of persons who transferred from the Canadian army to forces other than British. Most of these are believed to have gone to the American army or navy.

The navy, at the end of 1944, had enlisted 265 men and 21 women from the United States. Discharges totalled 79.

The money these thousands of American residents will receive from the Canadian Government in the form of discharge benefits is difficult to estimate, but it undoubtedly will be well beyond \$30,000,000.

Veterans Minister Mackenzie said recently that of 16 benefits available to discharged servicemen who remain in Canada, those who settle in the United States would receive eight.

These included a clothing allowance of \$100, a rehabilitation grant of one month's pay and allowances, transportation home, the war service gratuity—as an example, an unmarried private with two years' overseas service would receive a gratuity of \$325.50—vocational and educational training, disability pension, treatment for pensionable disability and insurance under the Veterans' Insurance Act.

## Fish Shipment

## From Great Slave Lake Area For Eastern Markets

Initial shipment of fish from Great Slave Lake, authorized by Ottawa this summer has arrived at Edmonton—100 tons in five refrigerated cars from Watrous. They had been carried 400 miles in cooler barges across Great Slave Lake and down the Slave and Athabasca rivers to the end of steel, with trans-shipment by truck over a portage at Fort Smith.

Eastern markets will get the bulk—mainly lake trout and whitefish. McInnes Products Corp. holder of the fishing rights of the lake this year, had applied for a quota of two million pounds. The present 100-ton shipment accordingly represents about a tenth of the season's catch.—Financial Post.

## MEET A CWAC—

"If you can bring yourself to think in terms of 35,250 eggs, 17,250 lbs. of meat, 690 lbs. of salt and 23½ lbs. of pepper, etc., as a month's supply you will have some idea of just how much food we handle," said Cpl. Edith Parry of the Main Supply Depot, No. 12 District Depot, Regina, Sask., when explaining the system of supplying food to the Army, Cpl. Parry, whose home is at 547 Hetherington Ave., Winnipeg, Man., enlisted in the Canadian Women's Army Corps in October, 1943. At the completion of her basic training, Vermilion, Alberta, she attended a clerk's course at Edmonton, Alta. In February, '44, Cpl. Parry was posted to the Service Corps, No. 12 District Depot, Regina, and as more or less an experienced woman was sent to the Supply Depot at Airport No. 11 Service Flying Training School, Yorkton, Sask. "I was the only CWAC in the Supply Depot at that time," Cpl. Parry explained. "Since then more and more CWACs have been used for this type of work and have been found to be very satisfactory." In December, '44, she was posted to the Supply Depot at Regina and was promoted to her present rank in January, '45. In conducting a tour through the Supply Depot, Cpl. Parry drew attention to the fact that only the very best grade of food was used in feeding service personnel, and that all food was stored under the most sanitary conditions.

## CWAC "REPATS"

Members of the Canadian Women's Army Corps to arrive in Saskatchewan recently from overseas and who have been serving in various theatres of war including England, the Continent and the Mediterranean were: Sgt. Peggy Johnson, Glenora; Sgt. Mabel Bates, Porcupine Plains; Sgt. Hilda Clark, Regina; Cpl. Goldie Margolis, Canwood; Cpl. Dorothy Hook, Prince Albert; Pte. Tillie Hancheroff, LeRoy; and Pte. Marge Syme, Watrous. These army women were the first to return to Saskatchewan under the plan whereby members of the corps are repatriated after more than two years service. Sgt. Bates, Cpl. Hook and Cpl. Clark were from the first draft to leave the province three years ago.

## THE WEARING OF CIVVIES—

Now that the war is won, restrictions on the wearing of civilian clothes have been somewhat lifted. Sergeants and above may now wear civvies after duty. For personnel below the rank of sergeants it is left to the discretion of the Commanding Officer.

## BRITISHER JOINS CANADIAN WOMEN'S ARMY CORPS—

A British war bride who joined the Canadian Women's Army Corps overseas, Pte. "Reggie" Brownlee was greeted in Regina recently by her husband, Cpl. "Larry" Brownlee, Saskatchewan, a veteran who returned to Canada just two weeks before his wife. Pte. Brownlee of Coulson, Surrey, England, was married in November, 1942, and enlisted in London, August 1, 1944. "I wanted to know more about the Canadians and I believed the best way was to live with Canadian girls and then come to Canada," she explained. Like others in Britain she had heard several fantastic stories about life in Canada but "they didn't go down with her." One thing she had heard of often is the Rockies and she's looking forward to the day when she and her husband move to Vancouver. "The trip west had been one continuous thrill," Pte. Brownlee said happily. Pte. Brownlee met her husband in April, 1941. Both agreed to be "live at first sight." As a member of the C.W.A.C. she has served recently with the Royal Canadian Army Pay Corps in London. Pte. Brownlee was one of the eight members of the C.W.A.C. to arrive aboard a troop train carrying personnel from the ship "Nieuw Amsterdam".

Sergeant (to Pte. Buttercup reporting late ten minutes late): "It's time to put you on the 'tato report'." Pte. Buttercup: But, please, Sergeant, I don't want to be tattooed!

GERMANS AID ALLIES—German prisoners of war are freeing U.S. soldiers for redeployment by doing work occupation forces normally would have to do, stack up used tires at a Mannheim salvage depot.

## New Railway Car

## Is To Be Equipped For Dancing And Movie Entertainment

Looking forward to post-war travel, Pullman-Standard has designed a new car with the definite objective of expanding the recreational opportunities of the train traveller. Dancing and movies will be a double feature of this car, said to be the first ever designed for these types of entertainment. The forward half of the car will be an ultra-modern club car during the day and a night club in the evening. The rear half will be a lounge by day and a movie theatre by night. Between the two sections there is a cubicle housing a radio, phonograph, movie screen and projector. Floor space for dancing will be 20 feet in length and nine feet wide, while the theatre will seat 20 persons. It is the belief of the builder that this car will open new avenues of entertainment while travelling.

## GEMS OF THOUGHT

## PRUDENCE

Prudence is a conformity to the rules of reason, truth, and decency, at all times and in all circumstances.—John Mason.

Those who, in the confidence of superior capacities or attainments, neglect the common maxims of life, should be reminded that nothing will supply the want of prudence.—Samuel Johnson.

The divine ruling gives prudence and energy; it banishes forever all envy, rivalry, evil thinking, evil speaking and acting; and mortal mind, thus purged, obtains peace and power outside of itself.—May Baker Eddy.

The greatest good is prudence; a more precious thing even than philosophy; from it spring all the other virtues.—Epictetus.

Let prudence always attend your pleasure; it is the way to enjoy the pleasures of them, and not be afraid of the consequences.—Jeremy Collier.

Prudence is a quality incompatible with vice, and can never be effectively enlisted in its cause.—Burke.

# GENERAL MACARTHUR'S TROOPS CRUSH JAPAN'S BIG BANKING COMBINE THAT BUILT UP WAR

TOKYO.—Gen. MacArthur's troops seized 21 financial institutions in Japan, ousted their officials and crushed with one swift blow the great banking combine that exploited an empire built by armed force.

Emperor Hirohito's personal fortune probably was involved in the action.

In a secret manoeuvre Gen. MacArthur threw armed American troops around financial houses in Tokyo, Osaka, Yokohama, Nagoya, Kobe, Shimonoseki and Fukuoka.

Meanwhile representatives of the Japanese finance ministry were summoned to supreme headquarters.

Then at 4 p.m. troops entered the banks and impounded all funds, securities and records. In that same instant the finance ministry was handed at headquarters the orders freezing operations and removing officials.

All the institutions, which provided financial backing for operations of the military conquests in Asia, are marked for liquidation, Gen. MacArthur announced.

The Bank of Japan, most powerful in all the empire, also was occupied to gain control of its assets, but headquarters said that as a commercial institution it was not permanently affected and was expected to reopen.

Gen. MacArthur also ordered closed all other financial institutions whose foremost purpose has been to finance colonization development activities in areas outside Japan or to finance war production.

Among the financial institutions seized were what might be called this "big three" of Japan's banking imperialism:

1. The Manchurian heavy industry development company, a combine greater even than the famous house of Mitsui. It exploited the riches of Manchuria and made fortunes for bankers, industrialists and generals.

2. Branches in Japan of the Bank of China (Korea), aligned with the Bank of Japan. It was the financial centre which fed the late war fed savers from Korea into China in a long-range attempt to spread economic chaos and prepare China for conquest.

3. The branches in Japan of the Bank of Taiwan (Formosa), mainly for financial control money by which the industrialists exploited the Philippines, Dutch Borneo and New Guinea. The houses of Mitsui and Mitsubishi were believed deeply involved in the Bank of Taiwan.

## OPEN HEALTH CENTRE

OTTAWA.—Veterans Minister Mackenzie announced that Canada's first veterans' health and occupation centre has been opened at Ottawa. The centre covers 280 acres, facing the Rideau river and adjoining Rideau park. Seven similar centres will be established later at Halifax, Saint John, N.B., Toronto, London, Ont., Winnipeg and Vancouver.

## WILL HAVE THEIR PART

CHUNGKING.—China will send occupation forces to Japan, a government spokesman, P. H. Chang, announced in response to a new conference question. Size of the force, he added, remains to be worked out on the basis of "future necessities" as decided upon by co-operating nations.

# AUSTRALIAN FOREIGN MINISTER SAYS ALL ACTIVE BELLIGERENTS MUST SHARE IN FRAMING PEACE

LONDON.—Australian Foreign Minister H. V. Evatt said that all active belligerents must have a share in the framing of the peace, which cannot rightfully be limited to the five powers represented on the council of foreign ministers.

Evatt made a vigorous bid at a press conference for Australia's rights, at least equal to those of France and Russia, in the peace councils.

He voiced Australia's demand for a "fair go" in the discussion of world peace. He said British Foreign Secretary Ernest Bevin had been "very prominent in advocating claims put forward by Australia and other active belligerent countries" for equal rights in the peace councils.

"Our invitation to the one session of Sept. 18 is recognition of our rights—the same rights extended to Italy," Evatt observed. "Surely we are entitled to be treated differently than defeated enemies."

He revealed that the collective invitations to the dominions did not extend beyond the single session of Sept. 18. Such procedure he said, "was unsatisfactory not only to Australia but also to Canada, New Zealand and South Africa, on whose behalf similar representations are being submitted."

## ARAB LEAGUE

Will Not Accept Plan For Jewish Immigration

CAIRO.—Abdul Rahman Azzam Bey, secretary general of the Arab League, said at a meeting here that the Arab League could not accept the plan, reported to have been supported by President Harry Truman in a letter to the British government, for the immigration of 100,000 Jews into Palestine.

"We cannot accept such a plan," Azzam Bey said, "we shall not co-operate in any way."

Azzam Bey declared that Palestine was an "Arab unit." "The Arabs want permanent peace. As the world cannot survive a third world war we want to reach our aims by co-operation," he said.

Arab circles are relieved that Britain, according to latest reports, has declined to assume entire responsibility for the Palestine question and intends to refer it to the council of the United Nations—a report carried in a Reuters dispatch from London.

## MAKING PROGRESS

Occupation Forces In South East Asia Are Disarming Japs

KANDY, Ceylon.—Smooth progress in disarming the 480,000 Japanese prisoners in the South East Asia theatre was reported. The Japanese in some cases having completed disarmament in advance of the date ordered.

Besides disarming the Japanese, the main job of British and Indian occupation forces in South East Asia is recovery of Allied prisoners of war and internees. On completion of these tasks they will withdraw from countries such as Java, Sumatra, Siam and Indo-China which were not under the British flag before the war.

The same principle will guide withdrawal of Australian forces from Borneo, Celebes and Dutch Timor.

## APPROVES PROGRAM

Admiral Halsey Urges Free Hand For MacArthur In Japan

HONOLULU.—Admiral William Halsey urged that Gen. MacArthur, Allied supreme commander, be given a free hand to carry out the occupation of Japan.

Admiral Halsey said Gen. MacArthur is carrying out a program that will prevent Japan from ever rising above a fifth-rate power. He addressed a civic reception for 20 recovered Allied military personnel.

The admiral, whose wartime remarks about the Japanese cracked with invective, explained he had been ordered not to say anything disagreeable about his recent adversaries in the Pacific.

But his voice was tense with emotion as he described the death of released American prisoners as a "result of brutal, bestial" treatment.

## CANADIAN UNITS

LONDON.—The following Canadian units arrived in the United Kingdom from the continent, en route back to the Dominion, between Sept. 17 and Sept. 25. The 2nd and 14th Field Batteries, Royal Canadian Artillery.

# AUSTRALIAN FOREIGN MINISTER SAYS ALL ACTIVE BELLIGERENTS MUST SHARE IN FRAMING PEACE

OTTAWA.—No comment was forthcoming from the office of Prime Minister Mackenzie King in reports from London that tentative plans have been advanced for a December meeting of an Allied control commission for Japan.

Prime Minister Mackenzie King recently told the House of Commons, however, that he planned to visit London soon if he could get away.

It was expected he may leave shortly for talks in the British capital with Prime Minister Attlee, Foreign Secretary Bevin and other members of the British government.

Informed quarters have already expressed the belief that procedure being followed in the drafting of terms of peace settlements in Europe were not particularly to the liking of the Canadian government or to the governments of the other dominions.

## GOOD CONDUCT BADGE

OTTAWA.—The navy announced that the good conduct badge, representing the highest standard of conduct in the service, now may be worn by ratings of the Women's Royal Canadian Naval Corps. Women will not receive the extra pay allowance granted men for the badge. It is war after three years of good conduct.

JAPS IN KOREA BOSSSED BY U.S.—Koreans who object to Japanese retaining public posts have been told by Lieut.-Gen. John R. Hodges, commander of the U.S. 24th Army Corps, that the Jap officials in the U.S. occupation zone are merely carrying out his directives.

## CITIZENSHIP BILL

Is Expected To Be Presented To Parliament Soon

OTTAWA.—Provision of Canadian citizenship under a bill expected to be presented at the current session of parliament will not deprive Canadians of their rights as British citizens, it was learned.

Under the legal change Canadians would be able to describe themselves as such, rather than as British citizens in a census and Canadian passports would take on a new significance.

One of the effects of the change would be to enable Canadian women who marry non-Canadians to elect whether they should remain Canadians or adopt the nationality of the husband.

## CANADIAN FASHIONS

Retail Stores From Coast To Coast Will Display Toronto-Made Merchandise

Over 2,500 retail stores from coast to coast will show in the week October first to sixth, Toronto-made merchandise in their windows and store displays.

The Toronto Fashion Industries (T.F.I.) that they are producing fashions as smart and goods as fine as any in the world. Now that restrictions are being removed, we all want to see Canadian industry go ahead. So take a good look in the stores at this show.

—Picture courtesy of Toronto Fashion Industries.

SMART ENSEMBLE.—This smart winter cocktail ensemble is one of the fashions to be featured during "Toronto Week", a coast to coast campaign to talk "up" Toronto-made clothes. The blouse is of lime rayon crepe, high-lighted by coin-dot sequins, and the hat, of taupe velvet, has a peeped crown, with peek-a-boo top. Blouse by Ray Hildebrand. Hat by Peggy Anne.

EMPEROR OF RUSSIA DAMAGED BY FLAMES.—Empress of Russia, former Canadian Pacific liner, shown above which was extensively damaged by fire recently while being refitted at Barrow-in-Furness, 12 miles north of Liverpool, for service as a government transport. The fire killed at least two people, whose bodies have been recovered. In 1943 the Empress of Russia was used to repatriate war prisoners; her other wartime activities have not been made known to the public.

## WANT TO RETURN

Thousands Of Displaced Poles In Germany Will Go Home

BERLIN.—Movement of thousands of Polish displaced persons from British and American zones of occupied Germany back toward Poland is expected to start soon, it was learned here.

It will be the first large-scale movement of Poles, virtually the last big group of displaced persons left in the British-American areas. Polish women and children from a dozen camps will travel in truck convoys through the Russian zone to their homeland.

Roads for the trip now are being reconstructed. Later, when minefields in the Baltic have been swept, some will return by sea from Hamburg and Bremen, likely going to Stettin.

Poles have been a big question mark among displaced persons in Germany. Some high officials feared few would want to return to Poland but when a survey was made thousands of volunteers were found. The total for returning Polish personnel may be as high as 500,000.

There is an additional residue of between 100,000 and 200,000 who will not return at present but their final decision apparently rests on reports their fellow countrymen sent back about conditions inside Poland.

## FACILITIES POOLED

Canadian And U.S. Ships Bringing Liberated Men From Pacific

MONTREAL.—Col. R. S. Malone, head of the army public relations branch, said that the hospital ship SS. Letitia now is en route to the Far East to repatriate Canadian liberated prisoners of war, and "I would say that the great majority of our men will be back in Canada within a matter of weeks, perhaps in only a month."

Col. Malone, who recently returned from Japan, said that the Canadian and United States governments were pooling their hospital ship facilities in order to expedite the return of liberated prisoners of war ready to come home. Any Canadians ready to embark on an American ship that was not filled would be placed aboard for return to Canada.

## DISMANTLE GERMAN PLANTS

FRANKFURT-ON-MAIN.—Gen. Eisenhower ordered that five big German industrial plants be dismantled for reparations. Among them the Kuppferhofer Gehr Schaefer company at Schweinfurt, largest ball bearing plant in Europe; and the Bremenswer shipyard at Bremen, one of the largest in Germany.

# COMMISSION TO DRAFT A REPORT WHICH MAY RESULT IN A NATIONAL FUEL POLICY

HELPED TOJO LIVE.—Capt. I. Roy Gold of U.S. army medical corps, who was in charge of the blood transfusion given to the former Jap premier, Hideki Tojo, is the son of Mrs. M. Gold of Montreal. Capt. Gold was born at Glace Bay, N.S., and educated in the public and high schools there before moving to Montreal. In 1942 he joined the U.S. army medical corps as a lieutenant.

OTTAWA.—The Canadian coal industry may not have post-war conversion problems similar to those of a manufacturer, but in some respects its problems would make most of those worrying manufacturers seem trifling, evidence now before the royal commission on coal indicates.

The commission—headed by Mr. Justice W. F. Carroll of Halifax and including Mr. Justice C. C. McLaughlin and Angus Morrison of Calgary—now is nearing the end of a collection of evidence on the Canadian coal situation which it started eight months ago.

Further hearings are scheduled in Ottawa starting Oct. 3 and then the commission will get down to the job of drafting a report which many of those connected with the coal industry hope will point the way to a national fuel policy for Canada.

One of the most difficult problems the industry faces is that of geography. Canada's main coal deposits are in the western provinces—British Columbia, Alberta and Saskatchewan—and in the maritimes—Nova Scotia and New Brunswick. The main markets are in the more heavily populated and industrialized provinces of Ontario and Quebec.

In pre-war years government assistance was given in meeting this handicap through freight subsidies. Now with increasing competition from other fields, particularly oil and electricity, and high production costs the difficulty is accentuated. As a result, one of the major points the commission has to consider is the position subsidies should have in the years ahead. During the war subsidies gave way to direct subsidies aimed at stepping up production to meet sharply increased demands for coal.

A further complication lies in the fact that while production costs have gone up in American mines, which offer the main competition to Canadian coal producers, the introduction of machinery on a large scale and big developments in strip mining during the war years point to a more intensive competition ahead.

## SHIPS FROM ORIENT

Have Been Rerouted To Avoid Panama Canal Tolls

LONDON.—The ministry of war transport announced that ships from New Zealand and Australia had been rerouted to avoid the Panama canal, where tolls must be paid in dollars. The ministry said ships from New Zealand would be sent generally around Cape Horn, although some would travel through the Suez canal.

Australian coal burners will be sent around the Cape of Good Hope and oil burners will go through Suez.

## LOST AT SEA

NEW YORK.—Sinking of a Japanese prison ship with between 700 and 1,000 Australian war prisoners may explain the mysterious disappearance of the majority of the garrison overwhelmed at Rabaul, New Guinea, in 1942, the Australian news and information bureau said.

# IMPERIAL TARIFF PREFERENCES MAY COME UNDER REVIEW WITHIN THE NEXT FEW MONTHS

OTTAWA.—A well informed official in the capital recently expressed the opinion the imperial tariff preferences would be under review within a few months by conferences of British commonwealth representatives.

He did not think there would be a full-sized imperial economic conference such as met in Ottawa in 1932 and which had a well-defined legal status. Instead, it likely would be a less cumbersome conference involving members of commonwealth governments and their staffs, the size depending on the number of economic questions to be studied.

Despatches from Washington have described the emphasis American negotiators are placing on a lessening of imperial preferences in any agreement between United States and the United Kingdom by which American financial assistance would be extended to enable Britain to meet her post-war difficulties.

Since the United States has free trade among its states and a tariff wall against the rest of the world, British spokesmen have frequently stressed similarly that the countries which made up the British commonwealth should not be deprived of any trading advantages they can get through special tariff concessions among themselves, not extended to foreign countries; even though the empires nations are spread around the earth.

Notwithstanding any rights of commonwealth countries to have tariff preferences there seems to be a feeling here that the time has come to review them and lessen them in the hope foreign nations also will reduce their tariff barriers.

Canada's attitude likely will be to inquire where the preferences it enjoys might be reduced and then leave it to the other commonwealth countries to decide whether they are desirous of changing any of the preferences which have helped them sell more products in Canada.

In 1938, the last year before the war, Canada sold the remainder of the empire more than \$500,000,000 worth of goods and bought less than half that amount. Therefore, with a shortage of dollar exchange in all other parts of the commonwealth, Canada would be hopeful nothing be done which would tend to increase the top-heavy trade balance that existed before the war. In fact Canadian trade officials are doing their utmost to find ways of reducing this balance by increased purchases from those countries.

## WANT RAILWAY

Suggests Line From Peace River To The Pacific Coast

OTTAWA.—The opening of Western Canada's Peace River district through construction of a railway to the Pacific coast was urged in the commons by Rev. James Irvine, C.P.E. member for the British Columbia riding of Cariboo.

The district needed the railway and it was time the country adopted a national railway policy.

## Local News

Mr. Andrew Charlesworth has returned home after better than two years spent at Calgary and Banff hospitals for injuries suffered at his employment here.

Miss Mary Ondrus was the guest of her uncle and aunt, Mr. and Mrs. Joe Kapalka, for three weeks.

Mr. Mike Pardell is visiting his daughters, Mrs. Anne Tognotti and Miss Margaret Pardell, at Trail, B.C.

Mr. Jack Derbyshire sr. is ill at his Third street home.

Mr. and Mrs. Fred Cox motored to Lethbridge on Saturday.

Mr. and Mrs. John Salus, accompanied by George Siska, visited at Lethbridge on Wednesday.

Miss E. Sanky, RN, of Calgary, was the guest of Mr. and Mrs. R. D. Simmons for a few days.

Mr. and Mrs. E. Salvador, of Creston, visited relatives and friends here at the week end.

Miss Carrie Sapeta, of Vancouver, is the guest of her parents, Mr. and Mrs. Albert Sapeta.

Mr. and Mrs. George Welsh visited relatives and friends in the Okanagan Valley for three weeks.

Miss Margaret Smith left at the week end for Calgary Technical school where she will take a course in art.

Mrs. Margaret Wilson and two daughters, of Jethbridge, were the guests of Mr. and Mrs. Adam Wilson last week.

Mr. and Mrs. Jock Bell, of Calgary, arrived in town this week and plan on residing here for a couple of months.

Mr. M. Matus, resident here for the past ten years or more, left during the week for Calgary where he has gained employment.

Mrs. S. J. Ford is a Calgary hospital patient.

Wm. "Bill" Anderson has left for Calgary Technical school where he will take a course in surveying.

Cpl. Jim Maurer, RCAF, who has been spending a furlough with his mother here, has returned to his base at the west coast.

Mr. and Mrs. Ernest Hill traveled to Calgary recently where they visited the former's mother who is a patient in a Calgary hospital.

Mrs. Harold Willetts entertained at two tables of bridge on Wednesday evening of last week. Honors were won by Mrs. T. Mitchell and Mrs. J. McNeill.

Mr. J. Modich left at the week end for Raymond where he has gained employment at the sugar factory during the idle time at present being experienced in the mines.

LAC and Mrs. Wm. Shields returned three weeks ago from eastern Canada where Bill had been stationed with the RCAF. He will report back to RCAF authorities in a month's time.

Mr. and Mrs. Wm. Clark and children will leave for Elko this week where they will take up residence. Mr. Clarke has taken a lease on the Knight's sawmill business in that district.

Mrs. Ernest Beart arrived home last Thursday morning from a holiday spent at Mercoal, where she was the guest of Mr. and Mrs. George Dufield, and at Edmonton where she visited friends.

The Journal acknowledges with thanks renewal subscriptions received from Major R. F. Barnes, who is still at Halifax and who sends his best regards to his many friends here; from Mr. Uno Gudmundson, of Lynn Creek, B.C., and Mrs. Isaac Dixon, of Vancouver.

Mayor and Mrs. Frank Abousafy, Louise, Edmund and the former's sister, Miss E. Abousafy, who had been their guest for the past few weeks, motored to Westkwin on Saturday morning to welcome home a brother who last week returned after several years overseas.

## In Memoriam

MCCULLOCH—In Loving Memory of my dear wife and our mother and granny, Grace McCulloch, who passed away on Oct. 2, 1944.

'Tis sweet to remember a loved one so dear,  
Though absent from us, yet ever so near.

How much we miss her no one shall know,  
We shall remember where ever we go.

Ever remembered by her husband and family and grandchildren.

GRIFFITHS — In Loving Memory of Daniel Griffiths, who died on Oct. 6, 1937.

Gone but not forgotten,  
Ever remembered by his loving wife, Anne, Doris and Mildred.
